(Exact name of registrant as specified in its charter)

**Delaware**

State or other jurisdiction of  
incorporation or organization

**27-4412575**

(I.R.S. Employer  
Identification No.)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of “large accelerated filer,” “accelerated filer,” “smaller reporting company,” and “emerging growth company” in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer   
(Do not check if a smaller reporting company)

Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).  Yes  No

As of May 8, 2018 there were 14,700,681 shares of the registrant’s common stock, par value \$0.001 per share, outstanding.

**SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS AND INDUSTRY DATA**

This Quarterly Report on Form 10-Q (this “Quarterly Report”) contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, which reflect our current views with respect to, among other things, our operations and financial performance. In some cases, you can identify forward-looking statements by terminology such as “anticipate,” “believe,” “estimate,” “expect,” “intend,” “may,” “plan,” “predict,” “project,” “will” or the negative of such terms or other comparable terminology. Forward-looking statements appear in a number of places throughout this Quarterly Report and include statements regarding our intentions, beliefs, projections, outlook, analyses or current expectations concerning, among other things, our ability and plan to develop and commercialize DKN-01 and TRX518; status, timing and results of preclinical studies and clinical trials; the potential benefits of DKN-01 and TRX518; the timing of our development programs and seeking regulatory approval of DKN-01 and TRX518; our ability to obtain and maintain regulatory approval; our estimates of expenses and future revenues and profitability; our estimates regarding our capital requirements and our needs for additional financing; our estimates of the size of the potential markets for DKN-01 and TRX518; our ability to attract collaborators with acceptable development, regulatory and commercial expertise; the benefits to be derived from any collaborations, license agreements, and other acquisition efforts, including those relating to the development and commercialization of DKN-01 and TRX518; sources of revenues and anticipated revenues, including contributions from any collaborations or license agreements for the development and commercialization of products; our ability to create an effective sales and marketing infrastructure if we elect to market and sell DKN-01 and TRX518 directly; the rate and degree of market acceptance of DKN-01 and TRX518; the timing and amount or reimbursement for DKN-01 and TRX518; the success of other competing therapies that may become available; the manufacturing capacity for DKN-01 and TRX518; our intellectual property position; our ability to maintain and protect our intellectual property rights; our results of operations, financial condition, liquidity, prospects, growth and strategies; the industry in which we operate; and the trends that may affect the industry or us.

By their nature, forward-looking statements involve risks and uncertainties because they relate to events, competitive dynamics and industry change, and depend on the economic circumstances that may or may not occur in the future or may occur on longer or shorter timelines than anticipated. Although we believe that we have a reasonable basis for each forward-looking statement contained in this Quarterly Report, we caution you that forward-looking statements are not guarantees of future performance and that our actual results of operations, financial condition and liquidity, and the development of the industry in which we operate may differ materially from the forward-looking statements contained in this Quarterly Report. In addition, even if our results of operations, financial condition and liquidity, and events in the industry in which we operate are consistent with the forward-looking statements contained in this Quarterly Report, they may not be predictive of results or developments in future periods. You should carefully read this Quarterly Report and the documents that we have filed as exhibits to this Quarterly Report completely.

You should refer to Part II, Item 1A, Risk Factors in this Quarterly Report and Part I, Item 1A, Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2017 as filed with the Securities and Exchange Commission on February 23, 2018 for a discussion of important factors that may cause our actual results to differ materially from those expressed or implied by our forward-looking statements. As a result of these factors, we cannot assure you that the forward-looking statements in this Quarterly Report will prove to be accurate. Furthermore, if our forward-looking statements prove to be inaccurate, the inaccuracy may be material. In light of the significant uncertainties in these forward-looking statements, you should not regard these statements as a representation or warranty by us or any other person that we will achieve our objectives and plans in any specified timeframe, or at all. Any forward-looking statements that we make in this Quarterly Report speaks only as of the date of such statement, and, except to the extent required by applicable law, we undertake no obligation to update such statements to reflect events or circumstances after the date of this Quarterly Report or to reflect the occurrence of unanticipated events. You should, therefore, not rely on these forward-looking statements as representing our views as of any date subsequent to the date of this Quarterly Report. Comparisons of results for current and any prior periods are not intended to express any future trends or indications of future performance, unless expressed as such, and should only be viewed as historical data.

DKN-01 and TRX518 are investigational drugs undergoing clinical development and have not been approved by the U.S. Food and Drug Administration (the “FDA”), nor been submitted to the FDA for approval. DKN-01 and TRX518 have not been, and may never be, approved by any regulatory agency or marketed anywhere in the world. Statements contained in this Quarterly Report should not be deemed to be promotional.

[Table of Contents](#)
**Leap Therapeutics, Inc.**
**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

(In thousands, except share and per share amounts)

(Unaudited)

**1. Nature of Business, Basis of Presentation and Liquidity**
*Nature of Business*

Leap Therapeutics, Inc. was incorporated in the state of Delaware as Dekkun Corporation on January 3, 2011 and changed its name to HealthCare Pharmaceuticals, Inc. effective May 29, 2014, and then to Leap Therapeutics, Inc. effective November 16, 2015 (the "Company"). During 2015, HealthCare Pharmaceuticals Pty Ltd. ("HCP Australia") was formed and is a wholly owned subsidiary of the Company. During 2017, the Company merged with Macrocare Ltd. (now "Leap Therapeutics Ltd.") and its wholly owned subsidiary Macrocare, Inc.

The Company is a biopharmaceutical company acquiring and developing novel therapeutics at the leading edge of cancer biology. The Company's approach is designed to target compelling tumor-promoting and immuno-oncology pathways to generate durable clinical benefit and enhanced outcomes for patients. The Company's programs are monoclonal antibodies that target key cellular pathways that enable cancer to grow and spread and specific mechanisms that activate the body's immune system to identify and attack cancer.

### *Basis of Presentation*

The accompanying condensed consolidated financial statements as of March 31, 2018 and for the three months ended March 31, 2018 and 2017 have been prepared by the Company, pursuant to the rules and regulations of the Securities and Exchange Commission (the "SEC") for interim financial statements. Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") have been condensed or omitted pursuant to such rules and regulations. However, the Company believes that the disclosures are adequate to make the information presented not misleading. These condensed consolidated financial statements should be read in conjunction with the Company's audited consolidated financial statements and the notes thereto for the year ended December 31, 2017 included in the Company's Annual Report on Form 10-K filed with the SEC on February 23, 2018.

The condensed consolidated financial statements have been prepared on the same basis as the audited consolidated financial statements. In the opinion of management, the accompanying condensed consolidated financial statements contain all adjustments which are necessary for the fair presentation of the Company's financial position as of March 31, 2018, statements of operations and statements of comprehensive loss for the three months ended March 31, 2018 and 2017 and statements of cash flows for the three months ended March 31, 2018 and 2017. Such adjustments are of a normal and recurring nature. The results of operations for the three months ended March 31, 2018 are not necessarily indicative of the results of operations that may be expected for the year ending December 31, 2018.

### *Liquidity*

Since inception, the Company has been engaged in organizational activities, including raising capital, and research and development activities. The Company does not yet have a product that has been approved by the Food and Drug Administration (the "FDA"), has not generated any revenues and has not yet achieved profitable operations, nor has it ever generated positive cash flows from operations. There is no assurance that profitable operations, if achieved, could be sustained on a continuing basis. Further, the Company's future operations are dependent on the success of the Company's efforts to raise additional capital, its research and commercialization efforts, regulatory approval, and, ultimately, the market acceptance of the Company's products.

In accordance with ASC 205-40, Going Concern, the Company has evaluated whether there are conditions and events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern within one year after the date that the condensed consolidated financial statements are issued. As of March 31, 2018, the Company had an accumulated deficit of \$141,019. During the three months ended March 31, 2018, the Company incurred a net loss of \$10,622 and used \$5,478 of cash in operations. The Company expects to continue to generate operating losses in the foreseeable future. The Company expects that its cash and cash equivalents of \$35,376 at March 31, 2018, together with the receipt of \$1,004 of research and development tax incentive payments in 2018 from the Commonwealth of Australia as a result of the 2017 research and development activities of the Company's Australian subsidiary, HCP Australia, will be sufficient to fund its operating expenses for at least the next 12 months from issuance of the condensed consolidated financial statements. In addition, the Company will seek additional funding through public or private equity financings or government programs and will seek funding or development program cost-sharing through collaboration agreements or licenses with larger pharmaceutical or biotechnology companies. If the Company does not obtain additional funding or development program cost-sharing, the Company would be forced to delay, reduce or eliminate certain clinical trials or research and development programs, reduce or eliminate discretionary operating expenses, and delay company and pipeline

---

## [Table of Contents](#)

expansion, which would adversely affect its business prospects. The inability to obtain funding, as and when needed, would have a negative impact on the Company's financial condition and ability to pursue its business strategies.

## **2. Summary of Significant Accounting Policies**

### *Principles of Consolidation*

The accompanying condensed consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries. All intercompany accounts and transactions are eliminated upon consolidation.

### *Use of Estimates*

The presentation of condensed consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the condensed consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

### *Research and development incentive income and receivable*

The Company recognizes other income from Australian research and development incentives when there is reasonable assurance that the income will be received, the relevant expenditure has been incurred, and the consideration can be reliably measured. The research and development incentive is one of the key elements of the Australian Government's support for Australia's innovation system and is supported by legislative law primarily in the form of the Australian Income Tax Assessment Act 1997, as long as eligibility criteria are met.

Management has assessed the Company's research and development activities and expenditures to determine which activities and expenditures are likely to be eligible under the research and development incentive regime described above. At each period end, management estimates the refundable tax offset available to the Company based on available information at the time. This estimate is also reviewed by external tax advisors on an annual basis.

Under the program, a percentage of eligible research and development expenses incurred by the Company through its subsidiary in Australia are reimbursed. The percentage was 43.5% for the year ended December 31, 2017 and for the three months ended March 31, 2018.

The research and development incentive receivable represents an amount due in connection with the above program. The Company has recorded a research and development incentive receivable of \$1,630 and \$1,744 as of March 31, 2018 and December 31, 2017, respectively, in the condensed consolidated balance sheets and other income from Australian research and development incentives of \$646 and \$397, respectively, in the condensed consolidated statements of operations and comprehensive loss for the three months ended March 31, 2018 and 2017 related to refundable research and development incentive program payments in Australia.

The following table shows the change in the research and development incentive receivable from December 31, 2016 to March 31, 2018 (in thousands):

Balance at December 31, 2016	\$	3,053
Australian research and development incentive income		1,715(1)
Cash received for 2016 eligible expenses		(3,245)
Foreign currency translation		221
Balance at December 31, 2017		1,744
Australian research and development incentive income		646
Cash received for 2016 eligible overseas research and development expenses		(740)
Foreign currency translation		(20)
Balance at March 31, 2018	\$	<u>1,630</u>

- (1) Certain supporting research and development activity is performed outside of Australia when there are no Australian facilities that support the activity (“Overseas research and development activities”). In October 2017, the Commonwealth of Australia issued the Company a favorable ruling on its Overseas research and development activities, considering such activities to be eligible research and development activities under the Australian Incentive Program. As such, the Company recorded Australian research and development incentives during the three months ended September 30, 2017 for its Overseas research and development activities performed during the year ended December 31, 2016 and the six months ended June 30, 2017, of \$347 and \$412, respectively.

## [Table of Contents](#)

### *Foreign Currency Translation*

The financial statements of the Company’s foreign subsidiary are measured using the local currency as the functional currency. Assets and liabilities of this subsidiary are translated into U.S. dollars at exchange rates as of the consolidated balance sheet date. Equity is translated at historical exchange rates. Revenues and expenses are translated into U.S. dollars at average rates of exchange in effect during the year. The resulting cumulative translation adjustments have been recorded as a separate component of stockholders’ equity. Realized foreign currency transaction gains and losses are included in the results of operations.

### *Deferred Offering Costs*

The Company capitalizes certain legal, professional accounting and other third-party fees that are directly associated with in-process equity financings as deferred offering costs until such financings are consummated. After consummation of the equity financing, these costs are recorded in stockholders’ equity as a reduction of additional paid-in capital generated as a result of the offering.

### *Other Assets*

Other assets as of March 31, 2018 and December 31, 2017 included \$1,076 of deposits made by the Company with certain service providers that are to be applied to future payments due under the service agreements or returned to the Company if not utilized. In addition, as of March 31, 2018, other assets included a deposit of \$35 related to the operating lease for the Company’s office space in Cambridge, Massachusetts.

### *Fair Value of Financial Instruments*

Certain assets and liabilities are carried at fair value under GAAP. Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Valuation techniques used to measure fair value must maximize the use of observable inputs and minimize the use of unobservable inputs. Financial assets and liabilities carried at fair value are to be classified and disclosed in one of the following three levels of the fair value hierarchy, of which the first two are considered observable and the last is considered unobservable:

- Level 1—Quoted prices in active markets for identical assets or liabilities.
- Level 2—Observable inputs (other than Level 1 quoted prices), such as quoted prices in active markets for similar assets or liabilities, quoted prices in markets that are not active for identical or similar assets or liabilities, or other inputs that are observable or can be corroborated by observable market data.
- Level 3—Unobservable inputs that are supported by little or no market activity and that are significant to determining the fair value of the assets or liabilities, including pricing models, discounted cash flow methodologies and similar techniques.

During the periods presented, the Company has not changed the manner in which it values assets and liabilities that are measured at fair value using Level 3 inputs. The Company recognizes transfers between levels of the fair value hierarchy as of the end of the reporting period. There were no transfers within the hierarchy during the three months ended March 31, 2018 and the year ended December 31, 2017.

A summary of the assets and liabilities carried at fair value in accordance with the hierarchy defined above is as follows (in thousands):

	Total	Level 1	Level 2	Level 3
<b>March 31, 2018</b>				
<b>Assets:</b>				
Cash equivalents	\$ 34,826	\$ 34,826	\$ —	\$ —
Total assets	\$ 34,826	\$ 34,826	\$ —	\$ —
<b>Liabilities:</b>				
Warrant liability	\$ 16,713	\$ —	\$ —	\$ 16,713
Total liabilities	\$ 16,713	\$ —	\$ —	\$ 16,713

12

[Table of Contents](#)

<b>December 31, 2017</b>				
<b>Assets:</b>				
Cash equivalents	\$ 25,737	\$ 25,737	\$ —	\$ —
Total assets	\$ 25,737	\$ 25,737	\$ —	\$ —
<b>Liabilities:</b>				
Warrant liability	\$ 11,862	\$ —	\$ —	\$ 11,862
Total liabilities	\$ 11,862	\$ —	\$ —	\$ 11,862

Cash equivalents of \$34,826 and \$25,737 as of March 31, 2018 and December 31, 2017, respectively, consisted of overnight investments and money market funds and are classified within Level 1 of the fair value hierarchy because they are valued using quoted market prices in active markets.

The carrying value of the research and development incentive receivable, accounts payable and accrued liabilities approximate their fair value due to the short-term nature of these assets and liabilities.

A roll-forward of the recurring fair value measurements of the warrant liability categorized with Level 3 inputs are as follows (in thousands):

<b>Balance—December 31, 2017</b>	11,862
Change in fair value	4,851
<b>Balance—March 31, 2018</b>	<u>\$ 16,713</u>

The warrant liability in the table above is composed of the fair value of warrants to purchase common shares that the Company issued in connection with the Private Placement. The fair value of the warrant liability was determined based on significant inputs not observable in the market, which represents a Level 3 measurement within the fair value hierarchy. The Company utilized a Monte Carlo simulation, which is a statistical method used to generate a defined number of share price paths to develop a reasonable estimate of the range of the future expected share prices, to value the warrant liability. The Monte Carlo simulation incorporated assumptions and estimates to value the warrant liability. Estimates and assumptions impacting the fair value measurement included the estimated probability of adjusting the exercise price of the warrants, the number of shares for which the warrants will be exercisable, the remaining contractual term of the warrants, the risk-free interest rate, the expected dividend yield, and the expected volatility of the price of the underlying common shares.

The Company historically has been a private company and lacks company-specific historical and implied volatility information of its shares. Therefore, it estimated its expected share volatility based on the historical volatility of publicly traded peer companies for a term equal to the remaining contractual term of the warrants. The risk-free interest rate was determined by reference to the U.S. Treasury yield curve for time periods approximately equal to the remaining contractual term of the warrants. The Company estimated a 0% expected dividend yield based on the fact that the Company has never paid or declared dividends and does not intend to do so in the foreseeable future.

*Net Loss per Share*

Basic net loss per share is computed using the weighted average number of common shares outstanding during the period. Diluted net loss per share is computed using the weighted average number of common shares outstanding during the period and, if dilutive, the weighted average number of potential shares of common stock, including the assumed exercise of stock options and warrants.

13

[Table of Contents](#)

*Warrant Liability*

In connection with entering into the Private Placement, the Company issued a warrant to purchase common stock with each share of common stock sold in the Private Placement. The Company classified the warrants as a liability on its consolidated balance sheet because each warrant represents a freestanding financial instrument that is not indexed to the Company's own shares. The warrant liability was initially recorded at fair value upon entering into the Private Placement agreement and is subsequently remeasured to fair value at each reporting date. Changes in the fair value of the warrant liability are recognized as gains (losses) in the condensed consolidated statement of operations. Changes in the fair value of the warrant liability will continue to be recognized until the warrants are exercised, expire or qualify for equity classification.

If the Company issues shares to discharge the liability, the derivative financial liability is derecognized and common stock and additional paid-in capital are recognized on the issuance of those shares. Warrants are valued using the Monte Carlo simulation model. If the terms of warrants that initially

require the warrant to be classified as a liability lapse, the liability is reclassified out of financial liabilities into equity at its fair value on that date. The cash proceeds received from exercises of warrants are recorded in common stock and additional paid-in capital.

#### *New Accounting Pronouncements*

The Company's significant accounting policies are described in Note 2, "Summary of Significant Accounting Policies", in the Company's previously filed Annual Report on Form 10-K for the year ended December 31, 2017.

### **3. Merger with Macrocare and Related Transactions**

#### *Merger with Macrocare Ltd.*

The Company entered into a definitive merger agreement (the "Merger Agreement"), dated as of August 29, 2016, with Macrocare Ltd. ("Macrocare"), a publicly held, clinical-stage biotechnology company based in Petach Tikva, Israel, and M-Co Merger Sub Ltd. ("Merger Sub"), a wholly owned subsidiary of the Company which provided for the merger of Macrocare with and into Merger Sub, with Macrocare continuing after the merger as a wholly owned subsidiary of the Company.

On January 23, 2017, the Company issued 3,256,898 shares of its common stock, net of fractional shares paid in cash, in exchange for 100% of the outstanding ordinary shares of Macrocare Ltd. upon consummation of the merger. Pursuant to the terms of the merger agreement, each holder of Macrocare's ordinary shares received approximately 0.1815 shares of the Company's common stock, plus cash in lieu of fractional shares based on a value of the Company's common stock of \$9.90 per share. The exchange ratio was based on a final net cash calculation, as of the closing, of \$21,875. The merger was accounted for as an in-substance recapitalization of the Company, as the transaction was, in essence, an exchange of shares of the Company's common stock (and options and warrants exercisable therefor) for cash. Apart from cash, the net assets acquired were \$96, and all Macrocare employees were terminated as of the effective time of the merger. Macrocare's cash and nominal assets and liabilities were measured and recognized at their fair values as of the date of the merger, and combined with the assets, liabilities and results of operations of the Company.

All Macrocare stock options granted under the Macrocare stock option plans (whether or not then exercisable) and all warrants to purchase Macrocare ordinary shares that were outstanding prior to the effective time of the merger became options and warrants, respectively, to purchase the Company's common stock equal to the number of ordinary shares of Macrocare issuable upon exercise of such stock options and warrants multiplied by the exchange ratio, with a corresponding exercise price equal to the exercise price of such stock options or warrants divided by the exchange ratio. All outstanding and unexercised Macrocare stock options and warrants assumed by the Company may be exercised solely for shares of the Company's common stock.

Vesting of all unvested Macrocare equity awards issued and outstanding was accelerated at the effective time of the merger, and all such equity awards issued and outstanding at the time of the merger remained issued and outstanding. For accounting purposes, since the acceleration of vesting was negotiated in contemplation of the merger, the remaining unrecognized compensation expense associated with the original grant date fair value of the awards of \$280 was recognized as a charge in the Company's condensed consolidated statement of operations and comprehensive loss for the three months ended March 31, 2017. In addition, the exercise period for all Macrocare options outstanding at the effective time of the merger was extended beyond the respective periods provided in the original awards. The Company recorded a charge of \$504 in connection with the extension of the exercise periods in the unaudited consolidated statement of operations and comprehensive loss for the three months ended March 31, 2017 equal to the difference in the fair value of the options immediately prior to and immediately following the modification of the exercise period.

In connection with the merger, the Company applied to be listed on the NASDAQ Global Market. NASDAQ approved the listing, and trading in the Company's common stock commenced on January 24, 2017, under the trading symbol "LPTX".

#### *Recapitalization and Amendments to Certificate of Incorporation*

On January 20, 2017, in connection with and prior to the completion of the merger with Macrocare, (a) all of the Company's outstanding shares of convertible preferred stock were converted into 3,174,523 shares of common stock, (b) the outstanding note

---

#### [Table of Contents](#)

payable and accrued interest was converted into 1,950,768 shares of common stock, and (c) the Company amended and restated its certificate of incorporation and bylaws to, among other things: (i) authorize 100,000,000 shares of common stock; (ii) eliminate all references to the previously existing series of the Company's preferred stock; (iii) authorize 10,000,000 shares of undesignated preferred stock that may be issued from time to time by the Company's board of directors and (iv) effect a one for 19.86754 reverse stock split of the Company's common stock outstanding immediately prior to the filing of the amended and restated certificate of incorporation.

#### *Subscription Agreement*

On January 20, 2017, prior and subject to the consummation of the merger, the Company and HealthCare Ventures IX, L.P. ("HCV IX") entered into a subscription agreement pursuant to which HCV IX purchased 1,010,225 shares of the Company's common stock for \$10,000, at a purchase price per share of \$9.90.

#### *Stock Option Grants*

On January 20, 2017, in connection with the consummation of the merger with Macrocare, the Company made an option grant to each of three executives to purchase 330,303 of shares of common stock, for a total of 990,909 shares of common stock, pursuant to our Amended and Restated 2012 Equity Incentive Plan. The options were granted at an exercise price \$9.90 per share. The options vested 33% on the first anniversary of the date of grant, and vest thereafter in equal monthly installments over a period of two years, generally subject to the executive's continued employment.

#### *Royalty Agreement and Letter Agreement*

On January 23, 2017, immediately prior to the merger, the Company entered into a royalty agreement with Leap Shareholder Royalty Vehicle, LLC, a Delaware limited liability company (the “Royalty Vehicle”), a special purpose vehicle formed for the specific purpose of entering into the royalty agreement. In connection with the transactions contemplated by the merger agreement, the Company declared a special distribution of certain royalty rights to each of its holders of common stock outstanding immediately prior to the effective time of the merger. These holders collectively beneficially owned or controlled 100% of the Company’s outstanding common stock at the time of the merger. Pursuant to the royalty agreement, the Company will pay to the special purpose vehicle (i) 5% of the Company’s net sales of products incorporating its TRX518 compound and (ii) 2% of the Company’s net sales of products incorporating its DKN-01 compound. The royalty agreement has an indefinite term, and neither the Company nor the special purpose vehicle has the right to terminate. The Company accounted for the royalty rights as a contingent liability.

#### 4. Accrued Expenses

Accrued expenses consist of the following:

	March 31, 2018	December 31, 2017
	(in thousands)	
Clinical trials	\$ 1,149	\$ 2,116
Professional fees	325	390
Payroll and related expenses	241	955
Accrued expenses	<u>\$ 1,715</u>	<u>\$ 3,461</u>

#### 5. Notes Payable—Related Party

During 2014, the Company entered into a convertible promissory note with a stockholder, and made multiple drawdowns under the note throughout 2014, 2015 and 2016. The note accrued interest at a rate of 8% per year until the principal of the note was either repaid or otherwise converted. As of December 31, 2016, the Company owed \$29,000 aggregate principal and \$1,274 of accrued interest in connection with the promissory note. Interest expense from the related-party note was \$0 and \$121 for the three months ended March 31, 2018 and 2017, respectively.

On January 13, 2017, the Company received aggregate proceeds of \$750 from an amendment and restatement of the promissory note. On January 20, 2017, in accordance with its terms and in connection with and prior and subject to the consummation of the merger with Macrocare, the outstanding note payable, including principal and accrued interest totaling \$31,145, was converted into 1,950,768 shares of common stock.

#### [Table of Contents](#)

#### 6. Warrants

As of March 31, 2018, outstanding warrants to purchase common stock consisted of the following:

Number of Shares Issuable	March 31, 2018			
	Exercise Price	Exercisable for	Classification	
54,516	\$ 0.01	Common Stock	Equity	
2,958,094	\$ 6.085	Common Stock	Liability	
<u>3,012,610</u>				

#### 2017 Warrants

On November 14, 2017, in connection with the Private Placement, the Company issued immediately exercisable warrants to purchase 2,958,094 shares of common stock to investors. The warrants have an exercise price of \$6.085 per share and expire on November 14, 2024.

The warrants contain full ratchet anti-dilution protection provisions. Company classifies the warrants as a liability on its consolidated balance sheet because each warrant represents a freestanding financial instrument that, due to the potential variable nature of the exercise price, is not considered to be indexed to the Company’s own shares. The warrant liability was initially recorded at fair value upon entering into the Private Placement and is subsequently remeasured to fair value at each reporting date. Changes in the fair value of the warrant liability are recognized as gains (losses) in the Company’s consolidated statement of operations. Changes in the fair value of the warrant liability will continue to be recognized until the warrants are exercised, expire or qualify for equity classification.

The fair value of the warrant liability was determined to be \$11,862 on December 31, 2017. The Company remeasured the liability as of March 31, 2018 and determined that the fair value of the warrant liability was \$16,713, resulting in a loss of \$4,851 recorded in the condensed consolidated statements of operations for the three months ended March 31, 2018.

#### 7. Common Stock

Each share of common stock entitles the holder to one vote on all matters submitted to a vote of the Company’s stockholders. Common stockholders are entitled to receive dividends, as may be declared by the board of directors, if any, subject to the preferential dividend rights of the preferred stockholders. Through March 31, 2018 no dividends have been declared.

As of March 31, 2018, the Company had reserved shares of common stock for the exercise of outstanding stock options and warrants, and the number of shares remaining for grant under the Company’s 2012 Equity Incentive Plan.

#### Subscription Agreement

On January 20, 2017, prior and subject to the consummation of the merger, the Company and HealthCare Ventures IX, L.P. (“HCV IX”) entered into a subscription agreement pursuant to which HCV IX purchased 1,010,225 shares of the Company’s common stock for \$10,000, at a purchase price per share of \$9.90.

#### *Definitive Merger Agreement with Macrocare Ltd.*

On January 20, 2017, in connection with and prior to the completion of the merger with Macrocare, (a) all of the Company’s outstanding shares of convertible preferred stock were converted into 3,174,523 shares of common stock, (b) the outstanding note payable and accrued interest was converted into 1,950,768 shares of common stock, and (c) the Company amended and restated its certificate of incorporation and bylaws to, among other things: (i) authorize 100,000,000 shares of common stock; (ii) eliminate all references to the previously existing series of the Company’s preferred stock; (iii) authorize 10,000,000 shares of undesignated preferred stock that may be issued from time to time by the Company’s board of directors and (iv) effect a one for 19.86754 reverse stock split of the Company’s common stock outstanding immediately prior to the filing of the amended and restated certificate of incorporation.

#### *Private Placement of Common Stock*

On November 14, 2017, the Company entered into purchase agreements (collectively, the “Purchase Agreements”) with certain accredited institutional investors (collectively, the “Purchasers”), each with substantially similar terms and conditions. Pursuant to the Purchase Agreements, the Company agreed to issue and sell to the Purchasers an aggregate of 2,958,094 shares of unregistered common stock at a price per share of \$6.085, for gross proceeds of \$18,000 (the “Private Placement”). Each common share was issued with a detachable warrant to purchase one share of common stock at an exercise price of \$6.085 per share, expiring

---

#### [Table of Contents](#)

seven years after the closing of the Purchase Agreements. The common shares issued in the Private Placement have the same rights and privileges as all other issued and outstanding common shares.

The gross proceeds of \$18,000 were first allocated to the fair value of the warrants of \$14,344 with the remaining proceeds of \$3,656 being allocated to the common stock. After giving effect to issuance costs related to the Private Placement, net proceeds were \$17,250. If all of the Warrants are exercised in cash at the stated exercise price during the term, the Company will receive additional proceeds of approximately \$18,000 and will issue an aggregate of 2,958,094 shares of common stock (the “Warrant Shares”).

The Company incurred \$750 of issuance costs associated with the Private Placement which consisted of legal, consulting and regulatory fees. The costs were allocated between the issuance of the common stock and warrants on a pro rata basis with the allocation of the proceeds, with approximately 80% of the costs allocated to the warrants and approximately 20% allocated to the common stock. The issuance costs associated with the common stock totaled \$152 and were recorded as a reduction to additional paid-in capital on the consolidated balance sheet. The issuance costs associated with the warrants totaled \$598 and were recorded within other expense on the consolidated statement of operations for the year ended December 31, 2017.

HealthCare Ventures IX, L.P. and Eli Lilly and Company, each a holder of more than 5% of the Company’s outstanding common stock, also purchased common stock and warrants in the Private Placement. Each of HealthCare Ventures IX, L.P. and Eli Lilly and Company agreed to purchase the common stock and warrants on the same terms and conditions as the other Purchasers in the Private Placement. Three of the Company’s directors and executive officers are affiliated with HealthCare Ventures IX, L.P. and its affiliates.

Pursuant to the terms of the Purchase Agreements, the Company was obligated to prepare and file with the SEC a registration statement (the “Registration Statement”) to register for resale the shares and the Warrant Shares on or prior to the date 30 days following the closing of the Private Placement, and use its best commercially reasonable efforts, subject to receipt of necessary information from the Purchasers, to cause the SEC to declare the Registration Statement effective within 60 days following the closing of the Private Placement or, if the Registration Statement is selected for review by the SEC, within 90 days following the closing of the Private Placement. In order to comply with such obligation, the Company filed a Registration Statement for the sale of the shares and Warrant Shares issued in the Private Placement on December 14, 2017. Two of the Purchasers opted not to register their shares or Warrant Shares and therefore, such shares and Warrant Shares were excluded from the Registration Statement.

#### *Public Offering of Common Stock*

On March 27, 2018, the Company completed a public offering whereby the Company issued 2,146,667 shares of its common stock at a price of \$7.50 per share, which included 280,000 shares issued pursuant to the underwriters’ exercise of their option to purchase additional shares of common stock. The aggregate net proceeds received by the Company from the offering were approximately \$14.8 million, net of underwriting discounts and commissions and estimated offering expenses payable by the Company.

The shares were offered pursuant to an effective shelf registration statement on Form S-3 (File No. 333-223419) that was previously filed by the Company with the SEC on March 2, 2018 and was declared effective by the SEC on March 16, 2018.

## **8. Equity Incentive Plans**

#### *Equity Incentive Plans*

In September 2012, the Company adopted the 2012 Equity Incentive Plan, as amended (the “Plan”), which provides designated employees of the Company and its affiliates, certain consultants and advisors who perform services for the Company and its affiliates, and nonemployee members of the Board of Directors of the Company and its affiliates with the opportunity to receive grants of incentive stock options, nonqualified stock options and stock awards. On January 20, 2017, the Company’s stockholders approved the amended and restated 2012 Equity Incentive Plan (the “2012 Plan”), which amended and restated the Plan and was effective in connection with the completion of the Company’s merger with Macrocare. As of March 31, 2018, there were 1,380,677 outstanding options issued under the 2012 Plan.

On January 20, 2017, the Company's stockholders approved the 2016 Equity Incentive Plan (the "2016 Plan"), which was effective in connection with the completion of the Company's merger with Macrocare. The number of shares of common stock issuable pursuant to outstanding awards granted under the 2016 Plan may not exceed the number that is equal to the sum of (i) 854,321 shares of common stock plus (ii) the number of shares of common stock (not to exceed 103,023 shares) subject to out-of-the-money options issued by Macrocare prior to the closing of the merger and assumed by the Company pursuant to the merger agreement upon consummation of the merger that expire unexercised. Beginning on January 1, 2018, the number of shares of common stock authorized for issuance pursuant to the 2016 Plan will be increased each January 1 by an amount equal to four percent (4%) of the Company's outstanding common stock as of the end of the immediately preceding calendar year or such other amount as

[Table of Contents](#)

determined by the compensation committee of the Company's Board of Directors.

In connection with the merger with Macrocare in January 2017, the Company assumed the Macrocare 2013 Share Incentive Plan (the "2013 Plan"), the Macrocare 2008 Stock Option Plan (the "2008 Plan") and all stock options outstanding under each of the 2013 Plan and the 2008 Plan immediately prior to the consummation of the merger. By virtue of the terms of the Merger Agreement and the 2013 Plan or the 2008 Plan, as applicable, each stock option outstanding immediately prior to the consummation of the merger was automatically converted into a stock option exercisable for a number of shares of the Company's common stock calculated based on the exchange ratio and the exercise price per share of such outstanding stock option.

The Company could also make awards of restricted stock under the 2016 Plan. Restricted stock may be issued for such consideration, in cash, other property or services, or any combination thereof, as is determined by the Board of Directors. During the restriction period applicable to the shares of restricted stock, such shares shall be subject to limitations on transferability, subject to forfeiture or repurchase by the Company and/or subject to other terms and conditions. Upon lapse of such restrictions, the stock certificates representing shares of common stock shall be delivered to the grantee.

A summary of activity under the Equity Plans is as follows:

	Options	Weighted Average Exercise Price Per Share	Weighted Average Remaining Life in Years	Aggregate Intrinsic Value
Outstanding at December 31, 2017	2,257,621	\$ 12.38	8.66	\$ 68
Granted	—	\$ —		
Exercised	—	\$ —		
Forfeited	(7,541)	\$ 7.24		
Outstanding at March 31, 2018	<u>2,250,080</u>	\$ 12.40	8.41	\$ 895
Options exercisable at March 31, 2018	1,165,704	\$ 15.79	7.78	\$ 242
Options vested and expected to vest at March 31, 2018	2,250,080	\$ 12.40	8.41	\$ 895

The grant date fair value of the options granted during the year ended December 31, 2017 was estimated at the date of grant using the Black-Scholes option valuation model. The expected life was estimated using the "simplified" method as defined by the Securities and Exchange Commission's Staff Accounting Bulletin 107, Share-Based Payment. The expected volatility was based on the historical volatility of comparable public companies from a representative peer group selected based on industry and market capitalization data. The risk-free interest rate was based on the continuous rates provided by the U.S. Treasury with a term approximating the expected life of the option. The expected dividend yield was 0% because the Company does not expect to pay any dividends for the foreseeable future. The Company elected the straight-line attribution method in recognizing the grant date fair value of options issued over the requisite service periods of the awards, which are generally the vesting periods. The Company did not grant any stock options during the three months ended March 31, 2018.

The assumptions that the Company used to determine the grant-date fair value of stock options granted to employees and directors during the year ended December 31, 2017 were as follows, presented on a weighted average basis:

	Year Ended December 31, 2017
Expected volatility	68.7%
Weighted average risk-free interest rate	2.10%
Expected dividend yield	0.00%
Expected term (in years)	6.6

Stock options generally vest over a three or four year period, as determined by the Compensation Committee of the Board of Directors at the time of grant. The options expire ten years from the grant date. As of March 31, 2018, there was approximately \$6,084 of unrecognized compensation cost related to non-vested stock options, which is expected to be recognized over a remaining weighted-average period of approximately 2.34 years.

The Company recognized stock-based compensation expense related to the issuance of stock option awards to employees and non-employees in the condensed consolidated statements of operations and comprehensive loss as follows:

[Table of Contents](#)

Three Months Ended March 31,	
2018	2017
(in thousands)	

Research and development	\$	117	\$	1,678
General and administrative		611		1,945
Total	\$	<u>728</u>	\$	<u>3,623</u>

## 9. Net Loss Per Share

Basic and diluted net loss per share for the three months ended March 31, 2018 and 2017 was calculated as follows (in thousands except share and per share amounts):

	Three Months Ended March 31, 2018	Three Months Ended March 31, 2017
Numerator:		
Net loss	\$ (10,622)	\$ (9,414)
Accretion of preferred stock to redemption value	—	(244)
Net loss attributable to common stockholders	<u>\$ (10,622)</u>	<u>\$ (9,658)</u>
Denominator:		
Weighted average number of common shares outstanding - basic and diluted	12,449,421	6,945,623
Net loss per share attributable to common stockholders - basic and diluted	<u>\$ (0.85)</u>	<u>\$ (1.39)</u>

The Company's potentially dilutive securities include stock options and warrants. These securities were excluded from the computations of diluted net loss per share for the three months ended March 31, 2018 and 2017, as the effect would be to reduce the net loss per share. The following table includes the potential common shares, presented based on amounts outstanding at each period end, that were excluded from the computation of diluted net loss per share attributable to common stockholders for the periods indicated because including them would have had an anti-dilutive effect:

	Three Months Ended March 31, 2018	Three Months Ended March 31, 2017
Options to purchase common stock	2,250,080	1,867,458
Warrants assumed from MacroCure	54,516	54,516
Warrants issued with the Private Placement	2,958,094	—
	<u>5,262,690</u>	<u>1,921,974</u>

## 10. Commitments and Contingencies

**Lease Agreement**—Effective January 1, 2017, the Company entered into an assignment agreement to assume an operating lease for its office space in Cambridge, Massachusetts. Annual rent under the lease, exclusive of operating expenses and real estate taxes, was \$289 for the 12-month period ending July 31, 2017, increasing to \$297 for the 12-month period ending July 31, 2018 and increasing to \$305 for the period ending April 30, 2019. The lease agreement expires April 30, 2019, and the Company has the option to extend the term through April 30, 2022.

**Manufacturing Agreements**—The Company is party to manufacturing agreements with vendors to manufacture TRX518 and DKN-01, our lead product candidates, for use in clinical trials. As of March 31, 2018, noncancelable commitments under these agreements totaled \$1,583.

**License and Service Agreement**—On January 3, 2011, the Company entered into a license agreement with Eli Lilly and Company (“Lilly”) to grant a license to the Company for certain intellectual property rights relating to pharmaceutically active compounds that may be useful in the treatment of bone healing, cancer and, potentially, other medical conditions. The Company previously issued 9,000,000 shares of Series A Stock to Lilly in consideration for the grant of the license. As defined in the license agreement, the Company would be required to pay royalties to Lilly based upon a percentage in the low single digits of net sales of developed products, if and when achieved. However, there can be no assurance that clinical or commercialization success of developed products will occur, and no royalties have been paid or accrued through March 31, 2018.

**License Agreement**—On May 28, 2015, the Company entered into a license agreement with Lonza Sales AG (“Lonza”), pursuant to which Lonza granted the Company a world-wide, non-exclusive license for certain intellectual property relating to a gene expression system for manufacturing DKN-01. As defined in the license agreement, the Company would be required to pay royalties

## [Table of Contents](#)

to Lonza based on a percentage in the low single digits of net sales of DKN-01, if and when achieved. However, there can be no assurance that clinical or commercialization success will occur, and no royalties have been paid or accrued through March 31, 2018.

**Legal Proceedings**—At each reporting date, the Company evaluates whether or not a potential loss amount or a potential range of loss is probable and reasonably estimable under the provisions of the authoritative guidance that addresses accounting for contingencies. The Company expenses as incurred the costs related to its legal proceedings.

A patent covering TRX518 and its uses was granted to the Company by the European Patent Office. Three notices of opposition to this patent were filed by two major pharmaceutical companies and an individual, possibly on behalf of a major pharmaceutical company. At the conclusion of the opposition proceedings in 2016, the Opposition Division of the European Patent Office that heard the case issued an interlocutory decision indicating that the Company's patent should be maintained with modified claims that differ from the claims as originally granted. These claims cover the TRX518 antibody and uses of TRX518 in a method of enhancing an immune response in a subject. In July 2016, the Company filed an appeal of the decision of the Opposition Division seeking to obtain broader claims that more closely reflect the claims as granted in the patent. The Board of Appeal has not scheduled a date for the appeal hearing. The Company is appealing the decision of the Opposition Division of the European Patent Office.

In 2016, a patent covering the use of TRX518 in combination with a chemotherapeutic agent for treating cancer was granted to the Company by the European patent office. In March 2017, notices of opposition to this patent were filed by ten different entities, including several major pharmaceutical

companies. The Company intends to defend the patent as granted through opposition proceedings.

**Indemnification Agreements**—In the ordinary course of business, the Company may provide indemnification of varying scope and terms to vendors, lessors, business partners and other parties with respect to certain matters including, but not limited to, losses arising out of breach of such agreements or from intellectual property infringement claims made by third parties. In addition, the Company has entered into indemnification agreements with members of its board of directors that will require the Company, among other things, to indemnify them against certain liabilities that may arise by reason of their status or service as directors or officers. The maximum potential amount of future payments the Company could be required to make under these indemnification agreements is, in many cases, unlimited. To date, the Company has not incurred any material costs as a result of such indemnifications. The Company is not aware of any claims under indemnification arrangements, and it has not accrued any liabilities related to such obligations in its condensed consolidated financial statements as of March 31, 2018 or December 31, 2017.

## 11. Related Party Transactions

During the three months ended March 31, 2017, the Company executed promissory notes with stockholders (See Note 5).

The Company has a license agreement with a stockholder (See Note 10).

On November 14, 2017, the Company entered into Purchase Agreements with certain Purchasers. Each of the Purchase Agreements was on terms and conditions substantially similar to each other Purchase Agreement and pursuant to such Purchase Agreements, the Company, in a private placement, agreed to issue and sell to the Purchasers an aggregate of 2,958,094 Shares of unregistered Common Stock, at a price per share of \$6.085, each share issued with a Warrant to purchase one share of Common Stock at an exercise price of \$6.085. HealthCare Ventures IX, L.P. and Eli Lilly and Company, each a more than 5% direct holder of the Company's Common Stock, purchased Common Stock and Warrants in the Private Placement. Each of HealthCare Ventures IX, L.P. and Eli Lilly and Company agreed to purchase the Common Stock and Warrants on the same terms and conditions as the other Purchasers. Three of the Company's directors and executive officers are affiliated with HealthCare Ventures IX, L.P. and its affiliates.

## Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

*The following Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") is intended to help the reader understand our results of operations and financial condition. This MD&A is provided as a supplement to, and should be read in conjunction with, our condensed consolidated financial statements and the accompanying notes thereto and other disclosures included in this Quarterly Report on Form 10-Q, including the disclosures under Part II, Item IA "Risk Factors", and our audited condensed consolidated financial statements and the accompanying notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2017, which was filed with the Securities and Exchange Commission, or the SEC, on February 23, 2018. Our condensed consolidated financial statements have been prepared in accordance with U.S. GAAP and, unless otherwise indicated, amounts are presented in U.S. dollars.*

### Company Overview

We are a biopharmaceutical company developing novel therapies designed to treat patients with cancer by inhibiting fundamental tumor-promoting pathways and by harnessing the immune system to attack cancer cells. Our strategy is to identify, acquire, and develop molecules that will rapidly translate into high impact therapeutics that generate durable clinical benefit and enhanced patient outcomes. Our two clinical stage programs are:

- **DKN-01:** A monoclonal antibody that inhibits Dickkopf-related protein 1, or DKK1. DKK1 is a protein that regulates the Wnt signaling pathways and enables tumor cells to proliferate and spread, as well as suppresses the immune system from attacking the tumor. When DKN-01 binds to DKK1, an anti-tumor effect can be generated. DKN-01-based therapies have generated responses and clinical benefit in several patient populations. We are currently studying DKN-01 in multiple ongoing clinical trials in patients with esophagogastric cancer, biliary tract cancer, or gynecologic cancers. We are focused on two parallel development strategies involving targeted patient populations with Wnt pathway alterations and as a combination with cancer immunotherapy.
- **TRX518:** A monoclonal antibody targeting the glucocorticoid-induced tumor necrosis factor-related receptor, or GITR. GITR is a receptor found on the surface of a wide range of immune cells. GITR stimulation activates tumor fighting white blood cells and decrease the activity of potentially tumor-protective immunosuppressive cells. TRX518 has been specifically engineered to enhance the immune system's anti-tumor response by activating GITR signaling without causing the immune cells to be destroyed. We are conducting two clinical trials of TRX518 in patients with advanced solid tumors and have recently begun enrolling combination therapy arms utilizing TRX518 in combination with gemcitabine chemotherapy or with cancer immunotherapies known as PD-1 antagonists.

We intend to apply our extensive experience identifying and developing transformational products to aggressively develop these antibodies and build a pipeline of programs that has the potential to change the practice of cancer medicine.

### Recent Developments

During the three months ended March 31, 2018, we made progress with the clinical development of our product candidates:

#### DKN-01:

- Completed enrollment of the dose escalation phase and presented interim data of a clinical trial evaluating DKN-01 and KEYTRUDA® (pembrolizumab) in patients with advanced esophagogastric cancer. Data from the dose escalation phase indicated that the combination was well tolerated with early signals of clinical activity. In the high-dose DKN-01 cohort, one of four evaluable patients naïve to anti-PD-1/PD-L1 therapy had a partial response with a 66% reduction in target tumor volume. This patient has a tumor phenotype which is typically less responsive to anti-PD-1 therapy. The study is now enrolling two expansion cohorts in patients with esophagogastric cancer who are naïve to anti-PD-1/PD-L1 therapy (n=40) and patients who are refractory to anti-PD-1/PD-L1 therapy (n=15).

- Presented data on the monotherapy activity of DKN-01 in patients with advanced esophagogastric cancer. Of 16 patients evaluable by central imaging analysis, two patients had a partial response and five patients had stable disease, representing a total disease control rate of 43.8%. One patient who had failed prior investigational immunotherapies had a partial response on DKN-01 monotherapy and remained on study for over a year.
- Enrolled the first patients in a clinical study evaluating DKN-01 as a monotherapy and in combination with paclitaxel in patients with endometrioid gynecologic cancers, a population of cancers with frequent alterations of the Wnt signaling pathway resulting in increased expression of DKK1.

[Table of Contents](#)

## TRX518:

- Enrolled first patient in a clinical trial evaluating Leap's G1TR agonist, TRX518, in combination with gemcitabine chemotherapy or in combination with KEYTRUDA® (pembrolizumab) or Opdivo® (nivolumab), anti-PD-1 therapies marketed by Merck (known as MSD outside the United States and Canada) or Bristol-Myers Squibb, respectively.

On March 27, 2018, we completed a financing for \$16.1 million in gross proceeds, which supports further growth of the company and extends our cash runway into the fourth quarter of 2019.

## Financial Overview

### Research and Development Expenses

Our research and development activities have included conducting nonclinical studies and clinical trials, manufacturing development efforts and activities related to regulatory filings for DKN-01 and TRX518. We recognize research and development expenses as they are incurred. Our research and development expenses consist primarily of:

- salaries and related overhead expenses for personnel in research and development functions, including costs related to stock-based compensation;
- fees paid to consultants and CROs for our nonclinical and clinical trials, and other related clinical trial fees, including but not limited to laboratory work, clinical trial database management, clinical trial material management and statistical compilation and analysis;
- costs related to acquiring and manufacturing clinical trial material; and
- costs related to compliance with regulatory requirements.

We plan to increase our research and development expenses for the foreseeable future as we continue the development of DKN-01, TRX518 and any other product candidates, subject to the availability of additional funding.

Our direct research and development expenses are tracked on a program-by-program basis and consist primarily of internal and external costs, such as employee costs, including salaries and stock-based compensation, other internal costs, fees paid to consultants, central laboratories, contractors and CROs in connection with our clinical and preclinical trial development activities. We use internal resources to manage our clinical and preclinical trial development activities and perform data analysis for such activities.

We participate, through our subsidiary in Australia, in the Australian government's research and development ("R&D") Incentive program, such that a percentage of our eligible research and development expenses are reimbursed by the Australian government as a refundable tax offset and such incentives are reflected as other income.

The table below summarizes our research and development expenses incurred by development program and the R&D Incentive income for the three months ended March 31, 2018 and 2017:

	<b>Three Months Ended March 31,</b>	
	<b>2018</b>	<b>2017</b>
	<b>(in thousands)</b>	
Direct research and development by program:		
DKN-01 program	\$ 3,193	\$ 4,899
TRX518 program	1,038	1,505
<b>Total research and development expenses</b>	<b>\$ 4,231</b>	<b>\$ 6,404</b>
<b>Australian research and development incentives</b>	<b>\$ 646</b>	<b>\$ 397</b>

The successful development of our clinical product candidates is highly uncertain. At this time, we cannot reasonably estimate the nature, timing or costs of the efforts that will be necessary to complete the remainder of the development of any of our product candidates or the period, if any, in which material net cash inflows from these product candidates may commence. This is due to the numerous risks and uncertainties associated with developing drugs, including the uncertainty of:

- the scope, rate of progress and expense of our ongoing, as well as any additional, clinical trials and other research and development activities;
- future clinical trial results; and

- the timing and receipt of any regulatory approvals.

A change in the outcome of any of these variables with respect to the development of a product candidate could result in a significant change in the costs and timing associated with the development of that product candidate. For example, if the FDA or another regulatory authority were to require us to conduct clinical trials beyond those that we currently anticipate will be required for the completion of clinical development of a product candidate, or if we experience significant delays in enrollment in any of our clinical trials, we could be required to expend significant additional financial resources and time on the completion of clinical development.

### ***General and Administrative Expenses***

General and administrative expenses consist primarily of salaries and related costs, including stock-based compensation, for personnel in executive, finance and administrative functions. General and administrative expenses also include direct and allocated facility-related costs as well as professional fees for legal, patent, consulting, accounting and audit services.

We anticipate that our general and administrative expenses will increase in the future as we increase our headcount to support our continued research activities and development of our product candidates. We also anticipate that we will incur increased accounting, audit, legal, regulatory, compliance, director and officer insurance costs as well as investor and public relations expenses associated with being a public company.

### ***Interest income***

Interest income consists primarily of interest income earned on cash and cash equivalents.

### ***Interest expense—related party***

Interest expense consists of interest accrued on notes payable—related party that we issued during 2017, 2016 and 2015. On January 20, 2017, prior and subject to the consummation of our merger with MacroCure, all of our notes payable and accrued interest were converted into 1,950,768 shares of common stock.

### ***Research and development incentive income***

Research and development incentive income includes payments under the R&D Incentive program from the government of Australia. The R&D Incentive is one of the key elements of the Australian Government’s support for Australia’s innovation system. It was developed to assist businesses to recover some of the costs of undertaking research and development. The research and development tax incentive provides a tax offset to eligible companies that engage in research and development activities.

Companies engaged in research and development may be eligible for either:

- a 43.5% refundable tax offset for entities with an aggregated turnover of less than A\$20 million per annum, or
- a 38.5% non-refundable tax offset for all other entities.

We recognize as income the amount we expect to be reimbursed for qualified expenses.

### ***Foreign currency translation adjustment***

Foreign currency translation adjustment consists of gains (losses) due to the revaluation of foreign currency transactions attributable to changes in foreign currency exchange rates associated with our Australian subsidiary.

## **Critical Accounting Policies and Estimates**

Our condensed consolidated financial statements are prepared in accordance with generally accepted accounting principles in the United States, or GAAP. The preparation of our financial statements and related disclosures requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenue, costs and expenses, and the disclosure of contingent assets and liabilities in our financial statements. We base our estimates on historical experience, known trends and events and various other factors that we believe are reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. We evaluate our estimates and assumptions on an ongoing basis.

Our actual results may differ from these estimates under different assumptions or conditions. During the three months ended March 31, 2018, there were no material changes to our critical accounting policies. Our critical accounting policies are described

under the heading “Management’s Discussion and Analysis of Financial Condition and Results of Operations— Critical Accounting Policies and Significant Judgments and Estimates” in our Annual Report on Form 10-K filed with the Securities and Exchange Commission, or SEC, on February 23, 2018 and the notes to the condensed consolidated financial statements appearing elsewhere in this Quarterly Report on Form 10-Q. We believe that of our critical accounting policies, the following accounting policies involve the most judgment and complexity:

- accrued research and development expenses
- research and development incentive receivable; and

## Results of Operations

### Comparison of the Three Months Ended March 31, 2018 and 2017

The following table summarizes our results of operations for the three months ended March 31, 2018 and 2017:

	Three Months Ended March 31,		Change
	2018	2017	
	(in thousands)		
<b>Operating expenses:</b>			
Research and development	\$ 4,231	\$ 6,404	\$ (2,173)
General and administrative	2,113	3,804	(1,691)
Total operating expenses	6,344	10,208	(3,864)
Loss from operations	(6,344)	(10,208)	3,864
Interest income	77	50	27
Interest expense	(6)	—	(6)
Interest expense - related party	—	(121)	121
Australian research and development incentives	646	397	249
Foreign currency gains	(144)	468	(612)
Loss on change in fair value of warrant liability	(4,851)	—	(4,851)
Net loss	<u>\$ (10,622)</u>	<u>\$ (9,414)</u>	<u>\$ (1,208)</u>

#### Research and Development Expenses

	Three Months Ended March 31,		Increase (Decrease)
	2018	2017	
	(in thousands)		
<b>Direct research and development by program:</b>			
DKN-01 program	\$ 3,193	\$ 4,899	\$ (1,706)
TRX518 program	1,038	1,505	(467)
Total research and development expenses	<u>\$ 4,231</u>	<u>\$ 6,404</u>	<u>\$ (2,173)</u>

Research and development expenses were \$4.2 million for the three months ended March 31, 2018, compared to \$6.4 million for the three months ended March 31, 2017. The decrease of \$2.2 million was primarily due to a decrease of \$1.6 million in stock based compensation expense and a decrease of \$0.6 million in manufacturing costs related to clinical trial material.

#### General and Administrative Expenses

General and administrative expenses were \$2.1 million for the three months ended March 31, 2018, compared to \$3.8 million for the three months ended March 31, 2017. The decrease of \$1.7 million in general and administrative expenses was primarily due to a decrease of \$1.3 million of stock based compensation expense and a decrease of \$0.6 million in legal, audit and consulting fees. These decreases were partially offset by an increase in insurance costs and taxes of \$0.2 million.

## [Table of Contents](#)

### Interest Income

We recorded interest income of \$0.1 million and \$0.1 million during the three months ended March 31, 2018 and 2017, respectively.

### Interest Expense—Related Party

We recorded interest expense—related party of \$0 for the three months ended March 31, 2018 compared to \$0.1 million for the three months ended March 31, 2017 related to borrowings under our note payable—related party. On January 20, 2017, in connection with and prior to the completion of the merger with MacroCure, the outstanding note payable and accrued interest was converted into 1,950,768 shares of common stock.

### Australian Research and Development Incentives

We recorded R&D incentive income of \$0.6 million and \$0.4 million in the three months ended March 31, 2018 and 2017, respectively, based upon the applicable percentage of eligible research and development activities under the Australian Incentive Program, which expenses included the cost of manufacturing clinical trial material.

We perform certain supporting research and development activity outside of Australia when there are no Australian facilities that support the activity (“Overseas research and development activities”). In October 2017, the Commonwealth of Australia issued us a favorable ruling on our Overseas research and development activities, considering such activities to be eligible research and development activities under the Australian Incentive Program. As such, we recorded R&D incentive income during the three months ended September 30, 2017 for our Overseas research and development activities performed during the year ended December 31, 2016 and the six months ended June 30, 2017, of \$0.3 million and \$0.4 million, respectively.

The R&D incentive receivable has been recorded as “Research and development incentive receivable” in the condensed consolidated balance sheets.

During the three months ended March 31, 2018, we received \$0.7 million of research and development tax incentive payments from the Commonwealth of Australia as a result of the research and development activities of our Australian subsidiary, HCP Australia.

### Foreign Currency Gains (loss)

We recorded a foreign currency loss of \$0.1 million during the three months ended March 31, 2018, compared to a gain of \$0.5 million during the three months ended March 31, 2017. Foreign currency gains and losses are due to changes in the Australian dollar exchange rate related to activities of the Australian entity.

### Loss on Change in Fair Value of Warrant Liability

We recorded a loss on the change in fair value of the warrant liability during the three months ended March 31, 2018. We remeasured the warrant liability as of March 31, 2018 and determined that the fair value was \$16.7 million, resulting in a loss of \$4.9 million recorded in the condensed consolidated statement of operations for the three months ended March 31, 2018.

### Financial Position, Liquidity and Capital Resources

Since our inception, we have incurred significant operating losses. We have not yet commercialized any of our product candidates, which are in various phases of clinical trials, and we do not expect to generate revenue from sales of any product for several years, if at all. We have funded our operations to date with proceeds from the sale of common stock and preferred stock and notes payable—related party.

As of March 31, 2018, we had cash and cash equivalents of \$35.4 million. During the three months ended March 31, 2018, we issued common stock in connection with a public offering for net proceeds of \$14.8 million.

We expect that our cash and cash equivalents of \$35.4 million at March 31, 2018, together with the receipt of \$1.0 million of research and development tax incentive payments from the Commonwealth of Australia as a result of the research and development activities of our Australian subsidiary, HealthCare Pharmaceuticals Pty. Ltd., will be sufficient to fund our operating expenses for at least the next 12 months from issuance of the financial statements included in this Quarterly Report on Form 10-Q. In addition, we will seek additional funding through public or private equity financings or government programs and will seek funding or development program cost-sharing through collaboration agreements or licenses with larger pharmaceutical or biotechnology companies. If we do not obtain additional funding or development program cost-sharing, we would be forced to delay, reduce or eliminate certain clinical trials or research and development programs, reduce or eliminate discretionary operating expenses, and delay company and pipeline expansion, which would adversely affect our business prospects. The inability to obtain funding, as and when needed, would have a negative impact on Leap's financial condition and our ability to pursue our business strategies.

### [Table of Contents](#)

### Cash Flows

The following table summarizes our sources and uses of cash for each of the periods presented:

	Three Months Ended March 31,	
	2018	2017
	(in thousands)	
Cash used in operating activities	\$ (5,478)	\$ (6,349)
Cash used in investing activities	—	(65)
Cash provided by financing activities	15,005	29,848
Effect of exchange rate changes on cash and cash equivalents	112	(427)
Net increase in cash and cash equivalents	<u>\$ 9,639</u>	<u>\$ 23,007</u>

*Operating activities.* Net cash used in operating activities for the three months ended March 31, 2018 was primarily related to our net loss from the operation of our business of \$10.6 million and net changes in working capital, including a decrease of \$0.4 million in accounts payable and accrued expenses, partially offset by a noncash change in the fair value of the warrant liability of \$4.9 million and noncash stock based compensation expense of \$0.7 million. The decrease in accounts payable and accrued expenses was due to timing of vendor payments.

Net cash used in operating activities for the three months ended March 31, 2017 was primarily related to our net loss from the operation of our business of \$9.4 million and net changes in working capital, including an increase in research and development incentive receivable and a decrease in accounts payable and accrued expenses of \$0.4 million and \$0.2 million, respectively, partially offset by noncash stock-based compensation expense of \$3.6 million. The decreases in accounts payable and accrued expenses was due to the timing of vendor payments.

*Investing Activities.* Net cash used in investing activities during the three months ended March 31, 2017 was related to purchases of equipment. There were no investing activities during the three months ended March 31, 2018.

*Financing Activities.* Net cash provided by financing activities for the three months ended March 31, 2018 consisted of \$15.0 million in proceeds from the issuance of common stock in connection with the March 2018 public offering, net of underwriter commissions and discounts.

Net cash provided by financing activities for the three months ended March 31, 2017 consisted of \$21.2 million in proceeds from the issuance of common stock in connection with the merger with Macrocore, \$10.0 million in proceeds from the issuance of common stock to existing shareholders and \$0.8 million in proceeds from notes payable—related party, partially offset by payments of \$2.1 million for deferred offering costs.

### Off-Balance Sheet Arrangements

We did not have during the periods presented, and we do not currently have, any off-balance sheet arrangements, as defined in the rules and regulations of the SEC.

### Item 3. Quantitative and Qualitative Disclosures about Market Risk

Not Applicable.

#### **Item 4. Controls and Procedures**

##### ***Evaluation of Disclosure Controls and Procedures***

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in the reports that we file or submit under the Securities and Exchange Act of 1934 is (1) recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms and (2) accumulated and communicated to our management, including our President and Chief Executive Officer, who is our principal executive officer, and Chief Financial Officer, who is also our principal financial and accounting officer, as appropriate, to allow timely decisions regarding required disclosure.

As of March 31, 2018, our management, with the participation of our principal executive officer and principal financial and accounting officer, evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities and Exchange Act of 1934) using the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control—Integrated Framework. Our management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives, and

26

---

##### [Table of Contents](#)

management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Our principal executive officer and principal financial and accounting officer have concluded based upon the evaluation described above that, as of March 31, 2018, our disclosure controls and procedures were effective to ensure that information required to be disclosed by it in reports the Company files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC, and that such material information is accumulated and communicated to the Company's management, including its Principal Executive Officer and Principal Financial Officer, to allow timely decisions regarding required disclosure.

##### ***Changes in Internal Control over Financial Reporting***

During the three months ended March 31, 2018, there were no changes in our internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) that materially affected, or are reasonably likely to affect, internal control over financial reporting.

## **Part II — OTHER INFORMATION**

#### **Item 1. Legal Proceedings**

None.

#### **Item 1A. Risk Factors**

An investment in our ordinary shares involves a high degree of risk. In addition to the other information contained elsewhere in this report, you should carefully consider the risk factors discussed in Part I, Item 1A "Risk Factors" in our Annual Report on Form 10-K for the year ended December 13, 2017 as filed with the SEC on February 23, 2018, which could materially affect our business, financial condition, operating results or cash flows. We operate in a dynamic and rapidly changing industry that involves numerous risks and uncertainties.

There have been no material changes in the risk factors described in Part 1, Item 1A "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2017 as filed with the SEC on February 23, 2018.

#### **Item 2. Unregistered Sales of Equity Securities and Use of Proceeds**

None.

#### **Item 3. Defaults Upon Senior Securities**

None.

#### **Item 4. Mine Safety Disclosures**

None.

#### **Item 5. Other Information**

None.

#### **Item 6. Exhibits**

**CERTIFICATION PURSUANT TO  
SECURITIES EXCHANGE ACT RULES 13a-14(a) AND 15d-14(a)**

I, Christopher K. Mirabelli, Ph.D., certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of Leap Therapeutics, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) for the registrant and have:
  - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - b) (Paragraph omitted pursuant to SEC release Nos. 33-8238/34-47986 and 33-8392/34-49133);
  - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures as of the end of the period covered by this report based on such evaluation; and
  - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's Board of Directors (or persons performing the equivalent functions):
  - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

May 11, 2018

Chief Executive Officer, President and  
Chairman of the Board  
(Principal Executive Officer)

**CERTIFICATION PURSUANT TO  
SECURITIES EXCHANGE ACT RULES 13a-14(a) AND 15d-14(a)**

I, Douglas E. Onsi, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of Leap Therapeutics, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) for the registrant and have:
  - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - b) (Paragraph omitted pursuant to SEC release Nos. 33-8238/34-47986 and 33-8392/34-49133);
  - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's Board of Directors (or persons performing the equivalent functions):
  - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

## CERTIFICATIONS PURSUANT TO

18 U.S.C. SECTION 1350,

AS ADOPTED PURSUANT TO

## SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002

In connection with the Quarterly Report of Leap Therapeutics, Inc. (the "Corporation") on Form 10-Q for the fiscal quarter ended March 31, 2018, as filed with the Securities and Exchange Commission on the date hereof (the "Report"), Christopher K. Mirabelli, Ph.D., the President and Chief Executive Officer of the Corporation, and Douglas E. Onsi, the Chief Financial Officer, General Counsel, Treasurer and Secretary of the Corporation, hereby certify, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that, to their knowledge:

- (1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
- (2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Corporation.
